## DETAILED ACTION

### *Drawings*

1. This application has been filed with informal drawings that are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

See attached form PTO-948.

### *Claim Objections*

2. Claim 11 is objected to because of the following informalities:

In claim 11, the whole sentence is missing at the end of the paragraph after "the sensor". Appropriate correction is required.

The following rejection to claim 11 is based on the original claim.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by

**Wickremasinghe** [US. 5,493,877].

In claim 11, the power liquid processing device is read on element 18 of Wickremansinghe, the liquid containment and the housing is read on element 20, the controller 12, the sensor circuit 42, the conductive sensor probe 38, outlet hose 24; the

Art Unit: 2636

sensor probe 38 is mounted within the housing 20 engaged to an outlet end of the outlet hose 24 from the device 18 (see figures 1-5; claim 4).

### ***Response to Arguments***

5. In response to applicant's arguments filed on 2/22/2005 regarding claim 11:

a) In electrical field, the conductivity of an audio jack is inherent since it is made by conductive material.

b) The term "housing" in claim 11 is so broad that any housing that contains the probe can fit the claimed element.

c) In addition to the argument, a probe having its own housing is known in the art such as in references by Braley (4,380,243), Clemens (2005/0051213), Henson (4,612,949), Petree (3,588,859); and the probe with its housing can be attached to various place of choice using various attachment means including the adhesive means of Wickremasinghe.

### ***Allowable Subject Matter***

6. Claims 1-9 are allowed.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
